Dimming actuator, 1-gang for KNX 20 - 500 W/VA

**GIRA** Data sheet

Specification	Order No.	Packing unit	PS	EAN
DRA	2171 00	1	26	4010337082200

#### **Features**

- Dim actuator with integrated bus coupler.
- Switching and dimming of light bulbs, HV halogen lamps, dimmable HV-LED lamps, dimmable compact fluorescent lamps, dimmable inductive transformers with LV halogen or NV-LED lamps, dimmable electronic transformers with LV halogen or NV-LED lamps.
- Automatic or manual selection of dimming principle according to load.
- Idle-state, short-circuit, and excess temperature-proof.
- Manual operation of the outputs independent of the bus (building site operation also possible).
- The dimming actuator, 1-gang can also be used as speed regulators for speed control of single-phase electric motors.
- Building site operation: Outputs can be operated manually without bus voltage with operating voltage only.

# **Functions**

- Independent control of the dimming channels.
- For building site operation, outputs can be operated manually without bus voltage with operating voltage only.
- Central switching function for control of all dimming channels.
- Delay for actively transmitted feedback messages following bus voltage recovery.
- The load type can be specified and the dimming principle defined: Universal (with automatic calibration procedure), electronic transformer/ LV LED (capacitive/phase cut), conventional transformer/LV LED (inductive/phase cut), HV LED (phase cut) or HV LED (phase cut).
- Feedback for "switching" and "brightness value".
- Dimmable brightness range can be set.
- Dimming behaviour and dimming characteristics can be parameterised.
- Switch-on behaviour for a relative dimming command can be parameterised.
- Bulb-saving switch-on and switch-off
- Automatic setting and scaling of the dimmable brightness range when using universal power boosters.
- The performance of a dimming channel in the "OFF" state during reception of a relative dimming command can be parameterised (switching and dimming or no response).
- Alarm telegrams for short circuit, overload, and load failure.
- Feedback of connected load type.
- Block function or forced setting function can be parameterised for each output.
- Time functions (switch-on or switch-off delay, staircase light function).
- Staircase light function with advance warning function via time-controlled reduction of lighting or activation of permanent lighting.
- Linking function and up to eight scenes per dimming channel possible.
- Elapsed-hours meter for recording switch-on time.

### **Technical data**

KNX medium: TP256

Rated voltage: AC 110 to 230 V, 50/60 Hz

Connected load (AC 230 V)

Light bulbs: 20 to 500 W
HV halogen lamps: 20 to 500 W
Wound electronic transformer: 20 to 500 VA
Tronic transformer 20 to 500 W
Wound transformer with NV-LED: 20 to 100 VA
electronic transformer with NV-LED: typically 20 to 100 W
HV LED lamps: typically 3 to 100 W

- HV LED lamps: typically 3 to 100 W
- Compact fluorescent lamp: typically 3 to 100 W

Connected load (AC 110 V)

20 to 250 W - Light bulbs: - HV halogen lamps: 20 to 250 W - Wound electronic transformer: 20 to 250 VA 20 to 250 W - Tronic transformer: - Wound transformer with NV-LED: 20 to 50 VA - electronic transformer with NV-LED: typically 20 to 50 W typically 3 to 50 W - HV LED lamps: - Compact fluorescent lamp: typically 3 to 50 W

Switching current for motors: 2.3 A

Connections

- KNX: Connection and junction terminal

- Load: Screw terminals

Connection cross section: Max. 4 mm<sup>2</sup>

### **Notes**

- Power expansion using Gira power boosts.
- Installation on DIN top-hat rail.
- VDE approval in accordance with EN 60669-1, EN 60669-2-1.

# Scope of supply

- Connection and junction terminal for KNX included with delivery.
