RF hand-held transmitters for KNX make the controller "mobile": From any point in the house, the required KNX function can be triggered conveniently by "remote control". The RF hand-held transmitters for KNX transmit KNX telegrams wirelessly when the button is pressed, depending on the parameter setting when the application program is loaded. These could include telegrams for switching/pressing, dimming, or blind control. It is also possible to program encoder functions (dimming encoders and scene auxiliary units).

Features

- Confirmation function as well as transmit and status display by 2-colour LED (red/green) separately for each button by 2-stage display function.
- Optional status display by separate 1-bit status communication objects.
- Transmit and confirmation display can be switched off.
- Project planning, commissioning and parameter setting are performed using ETS (version 5 or later).
- Battery-operated device.
